

## 24 Hour Emergency response.

When flooding, back-ups, mold and other problems threaten your home or workplace, you need quick, thorough service to get rid of the problem. All Dry Restoration specializes in water damage restoration and cleanup in Cincinnati, OH. We understand water damage and mold cleanup requires emergency attention, and we work fast to get your home or office back to normal.

Flooding, leaks, sewage backup, mold and other damages from water or residue can severely damage the value of your home and can even make it unlivable. These problems can make your workplace unusable, costing you thousands or even millions of dollars. Water damages don't have to ruin your home or workplace. All Dry Restoration has the tools and experienced staff to dry up water, dry out wood, eliminate mold, clean up sewer backup and more. Once the team has finished, the damages will be erased and your home or workplace will be just like new.

# Water Damage? **DON'T PANIC**

**Call the experts in water damage restoration and our team will be at your location in less than an hour to take care of the problem.**

There are many different problems and emergencies that can occur to cause water damage. Broken pipes, leaky roofs, sewage backup and flooding can cause water to get into your home or workplace and damage your interior. Standing water can damage your carpets, hardwood floors, furniture, fixtures and much more. All Dry Restoration provides hardwood floor drying and mold removal services in Cincinnati, OH, to solve these problems and stop the damage.

## **Four reasons to call today:**

### **WE'RE AVAILABLE 24/7, 365 DAYS A YEAR.**

Our rapid response is available 24 hours a day, 7 days a week, even on holidays!

### **WE'LL BE THERE IN 1 HOUR OR LESS.**

You can count on us to get your home or office back to normal, and fast. We have water damage cleanup crews on standby, ready to respond to your emergency.

### **WE HAVE EXCELLENT CUSTOMER SERVICE.**

Call us and get a live person, not an answering machine. We will be able to answer any questions you may have, as well as explain our clean up process.

### **WE GIVE PREVENTITIVE TIPS FROM TECHNICIANS.**

In addition to restoring your home or office, our trained technicians are happy to provide you with tips on how to avoid water damage in the future.

## **Water Damage Restoration**

Water damage restoration service is our business! We specialize in mitigating all types of flood and water damage to all types of building materials. If you have a flooded basement, crawl space, kitchen or bathroom, it's important that you act quickly to minimize the water damage.

## **Mold Remediation**

In the event that water damage goes undetected or untreated and mold grows inside your home, we are nationally trained and certified to remediate it. Following established industry protocols for mold remediation, your mold can be safely and correctly removed, and without cross contaminating other areas of your home.

## **Mold Testing**

Mold testing is the best and most objective way to evaluate the mold levels within your home or business. Since mold spores are too small to see with the naked eye, relying strictly in visual evidence of mold contamination has limitations. Consider air testing for a true picture of the actual mold levels in your air.

## **Hardwood Floor Drying**

Water damaged hardwood flooring can be identified by cupping, warping, discoloration and flaking of the surface. Due to density and vapor barriers, wood floors are one of the most difficult materials to dry. Wood floors must be promptly dried and we urge you to have your water damaged wood floor moisture tested and evaluate.

## **Sewage Clean Up**

Severe rainstorms, floods, and even spring thaws can put a strain on sanitary sewers and septic systems. Large volumes of storm water and ground water entering sewage systems can inundate them, causing backups into your basement. Blockages in sewage systems can also cause backups. Your health may be impacted if a sewage back up occurs in your home. Calling a professional in a hurry would be highly recommended.
